TEST MY STRESS® · SAMPLE REPORT

What the report contains

Level 1 · AWARENESS — assessment by questionnaires

The report is a personal written document of about 20 pages. It has four modules. Each module explains what is being assessed, shows the personal result on a scale and gives practical guidance. The report is followed by a consultation in which a specialist discusses the results with the participant.

The data in this sample were collected specifically for it from different participants. They do not describe one person.

1 Social factors of health

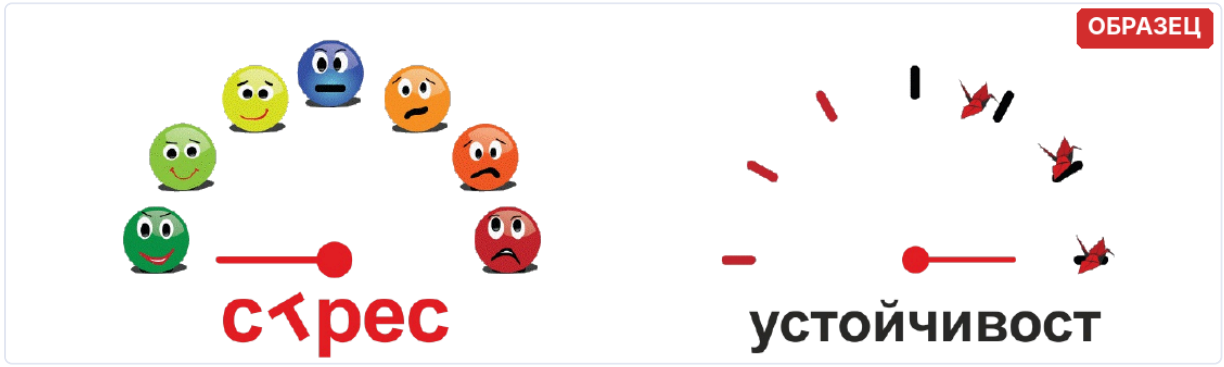

How lifestyle and social environment affect the ability to cope with stress.

WHAT IT SHOWS

- sex, age and life stage
- education, family, children, housing, place of residence
- work, income and satisfaction
- conclusion: stress level and resilience level

IN THE SAMPLE

High resilience and low stress; the resources the person can rely on are listed.

2 Mental state

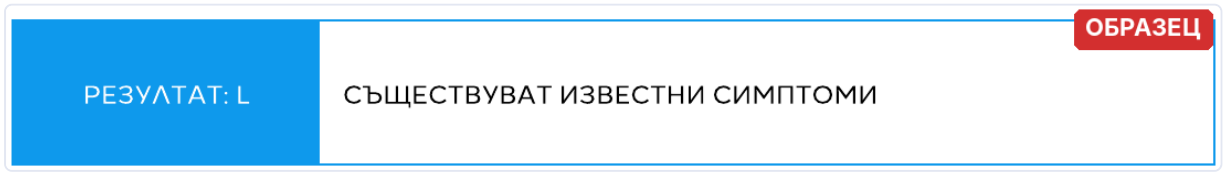

Screening of six areas using the standardised PRIME-MD questionnaire.

WHAT IT SHOWS

- somatoform state (physical signs of tension)
- depressive state
- panic disorder and other anxiety
- eating and alcohol use

IN THE SAMPLE

Some physical signs of tension; no signs in the other five areas.

3 Occupational burnout

Degree of burnout using the Oldenburg Burnout Inventory (OLBI).

WHAT IT SHOWS

- disengagement and emotional exhaustion
- total score and burnout stage
- signs to watch for
- practical steps for changing work habits

IN THE SAMPLE

Disengagement 18, exhaustion 18, total 36 — stage of developing symptoms.

ОБРАЗЕЦ

	НЕАНГАЖИРАНОСТ: 18
	ЕМОЦИОНАЛНО ИЗТОЩЕНИЕ: 18
	ТОТАЛ: 36

4 Life events

Accumulated stress from significant events in the past 12 and 24 months, using the Holmes–Rahe scale.

WHAT IT SHOWS

- events experienced, by period
- life stress inventory
- stress accelerator
- stress resistance

IN THE SAMPLE

Low levels of life stress (39 and 105 points) and high resilience.

What comes next

Results consultation
A psychophysiologist walks the participant through the report and answers questions.

Next step
Together they decide whether support is needed: counselling, monitoring or a repeat assessment.

The report grows with the package

AWARENESS	The four questionnaire modules in this sample
INSIGHT	+ working memory and focus under distraction (cognitive tasks)
TEST MY HEART & MIND **Integrated Health Point**	+ 24-hour ECG: heart rate and heart rate variability
TEST MY BRAIN, HEART & BODY **Total Stress Point**	+ laboratory biomarkers [TO BE CONFIRMED]

Test My Stress® is a screening, not a diagnosis. The results do not replace a consultation with a doctor or other specialist. The images are excerpts from a sample report built from data of different participants; the report itself is in Bulgarian.
